

# JCD Airport – Boarding Network – Plexi static

2021

**CRL Network – 10 faces - 2 m<sup>2</sup> - Plexi Static**

## TECHNICAL SPECIFICATIONS

Data to provide for production

### File characteristics

Adobe PDF is the standard for the exchange of composite digital files.  
The creation of Adobe PDF files can easily be done from Adobe Indesign.

- **We only accept Adobe PDF (1.4 to 1.7) files. (1 visual = 1 PDF)**
- The size of the pdf file must be 1/10 of the real format + 10 mm bleed
- The image resolution should be 450 dpi (on 1/10 file size)
- All elements (images and vector) used in the document must be in CMYK (No RGB or spot color)

For more information on how to create a valid Adobe PDF file look to the userguide page “HOW MAKE A GOOD PDF”.

### Visual dimensions

**Visible Area: 117 cm x 177 cm**

Area corresponding to the visible part of the layout once installed. All elements out of this area / format are in the bleed part and will not be visible.

**Overall Format: 180 cm x 120 cm**

Final format of the file to be supplied. Format corresponding to the visible format + bleed.

Do not include any text, logo or pictures you want to have visible in the bleed part.

Bleed is technically needed and will not be visible on the final installed layout.

### Control

Control of the file by our supplier. Corrections if needed with a 2 working days delay

### Production lead-time

10 working days from receipt of files

### Delivery

Deliver file with WeTransfer or similar to: [prodairport@jcdecaux.com](mailto:prodairport@jcdecaux.com)

Info contact: [Sophie.Margetis@jcdecaux.com](mailto:Sophie.Margetis@jcdecaux.com)
